Practice Overview

For the last 15 years, Nicholas has specialized in large and complex commercial fraud and international trust cases, many of them offshore and/or with a multi-jurisdictional element. He is highly experienced in freezing injunctions and tracing remedies, as well as jurisdiction disputes. He has practiced in many different jurisdictions, including Bermuda, the Isle of Man, Jersey, the BVI, the Bahamas and the Cayman Islands. Nicholas's practice is unusual in that he undertakes very few cases and will generally work on only one case at a time, sometimes over a period of several years. However he will also from time to time also undertake smaller cases.

Nicholas has been instructed in a number of the most substantial commercial fraud and international trust cases of recent times. Cases of note include:
